Dear Mikhail and the entire Kreussler Pharmaceutical Team,

On behalf of the Hackett Hemwall Patterson Foundation, I would like to extend our heartfelt gratitude for your generous donation of polidocanol. Your support plays a crucial role in our Veins missions to Honduras, where we provide essential medical care to underserved communities and train doctors from Honduras and around the world in advanced vein treatment techniques.

The polidocanol you provided is an invaluable resource, enabling us to deliver high-quality care to those who would otherwise lack access to these services. Through these missions, not only do we address immediate medical needs, but we also empower a global network of healthcare professionals with the skills and experience necessary to continue serving their communities long after the mission concludes. This past mission we treated more than 2000 patients in three clinics in Honduras. Of special note are the amazing results we are seeing with leg ulcer healing using polidocanol to seal off veins and allow the wounds to heal. This is not only giving people their life back without open wounds, it's allowing us to create a new program protocol to teach many more physicians both in country and internationally exactly how to help more people with this all too common issue.

I truly appreciate being able to work with you each year to help cover our needs, as well as your amazing response in shipping products so quickly. Your partnership in this work amplifies our ability to create lasting, positive change. We are deeply appreciative of your commitment to supporting our mission and advancing healthcare for underserved populations.

With gratitude,

Kay Weeden
HHPF Executive Director
