 20 mg/ml Polidocanol <sup>1</sup>	2.5	3	3.5	4.5						
 30 mg/ml Polidocanol <sup>1</sup>	1.5	2	2.5	3						
Volume (ml) per injection					0.1 – 0.2 ml	0.1 – 0.3 ml	0.5 – 2.0 ml <sup>3</sup>	0.5 – 2.0 ml <sup>3</sup>	0.5 – 1.0 ml <sup>4</sup>	

**Aethoxysklerol®** universell einsetzbar bei optimaler Wirkung und Verträglichkeit  
**Aethoxysklerol®** universally applicable with an optimum of efficacy and tolerance  
**Aetoxisclerol®** universellement applicable avec efficacité et tolérance optimales  
**Atossisclerol®** utilizzo universale con un massimo di efficacia e tolleranza  
**Etoxisclerol®** aplicación universal con efecto y tolerancia óptima

Availability of different concentrations depends on national marketing authorisation.  
 Dosage according to the German SPC.

<sup>1</sup> Polidocanol, also known as Lauromacrogol 400, is produced by Kreussler and GMP-approved

<sup>2</sup> For spider veins, Aethoxysklerol 1% is administered only in central veins of spider veins

<sup>3</sup> In the first treatment session, only one injection of 0.5 – 1 ml should be given

<sup>4</sup> For sclerotherapy of haemorrhoidal disease, a total of 3 ml should not be exceeded during one treatment session;  
 when treating an 11 o'clock haemorrhoid in men, the quantity injected must not exceed 0.5 ml
